

NORDdoor - Paigaldusjuhend

Kasutus

Õhukanalite kontrollimiseks ja puhastamiseks paigaldatakse õhukanalitele kergesti ligipääsetavatesse kohtadesse kontroll-/puhastusluugid. Erilist tähelepanu tuleb pöörata väljatõmbeseadmete puhastatavusele. Kontroll-/puhastusluukide asukoha valitakse selle järgi, et puhastustöid saaks kergelt ja turvaliselt teostada.

Eesti standardis EVS-EN 12097:2006, on välja toodud puhastusluukide miinimum mõõdud ja asukohad.

Luukide paigaldamisel:

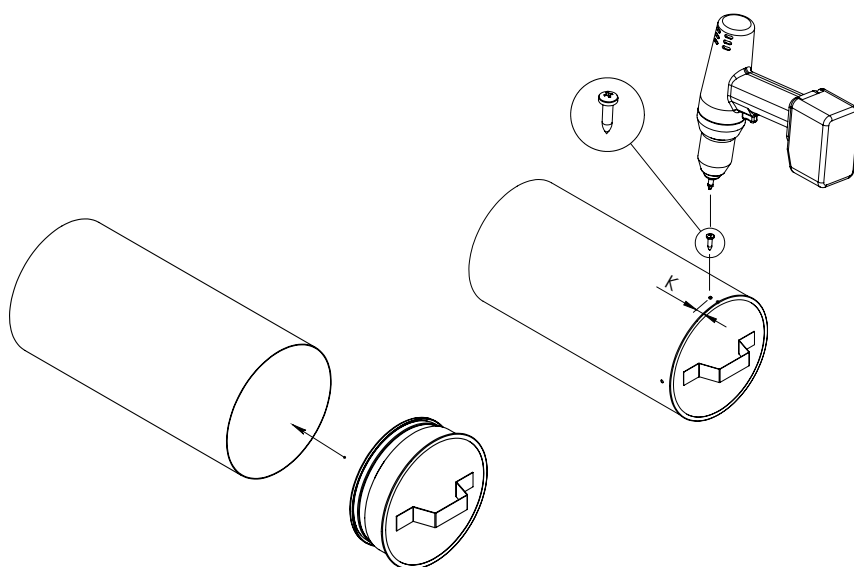

- kontrolli, et torusse lõigatud ava serva ei jääks teravaid servi.
- pane puhastusluukide paigaldamiseks või kanali puhastamiseks kätte kaitsekindad traumade vältimiseks.
- kontrolli, et tulekindluse tagamiseks selleks ettenähtud kohtades oleksid puhastusluugid kinnitatud kruvidega.

NORDdoor - Paigaldusjuhend

1. Kinnita paigaldusšabloon toru peale sirgelt toru pikisuunas.
2. Lõika kleebise serva mööda torusse ava ja puhasta lõikeserv.
3. Paigalda luuk avasse jälgides kleebise kinnitusmärke.
4. Kinnita luuk käepidet alla vajutades.

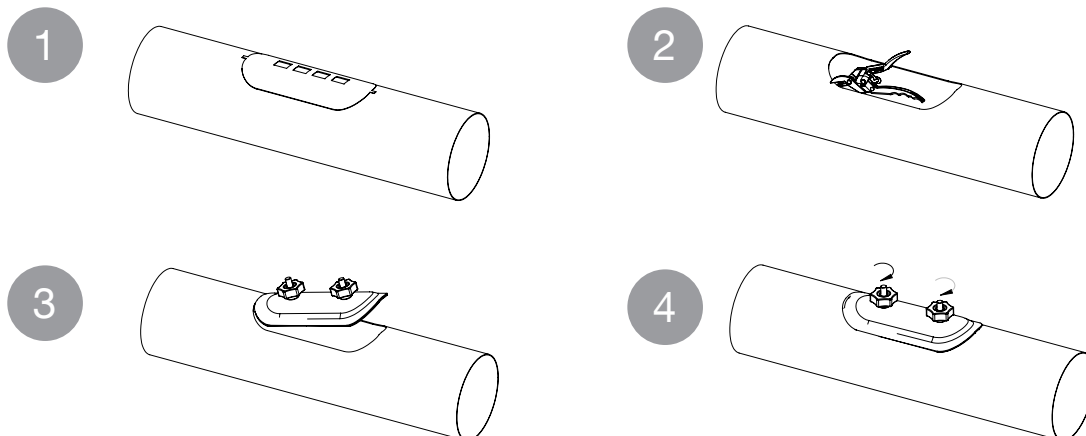

Töö kvaliteedi tagavad professionaalsed töövõtted.

TL3

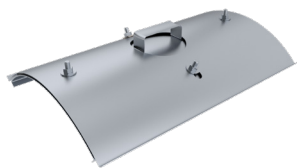

1. Kleepige luugiga kaasas olev isekleepuv šabloon toru peale.
2. Lõigake ava välja tolerantsiga +3 mm.
3. Paigaldage luuk keerates käepideme nupud lahti, kuni keere on poldi ülaosaga samal tasemel. Asetage luuk nurga all auku, pöörake otseks ja tõmmake veidi välja.
4. Lukustage luuk keerates käepidemenupud kinni.
