

NORDdoor - Paigaldusjuhend

Kasutus

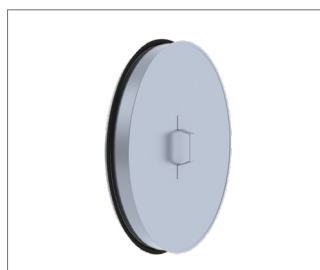

Õhukanalite kontrollimiseks ja puhastamiseks paigaldatakse õhukanalitele kergesti ligipääsetavatesse kohtadesse puhastusluugid. Erilist tähelepanu tuleb pöörata väljatõmbeseadmete puhastatavusele. Puhastusluukide asukoha valitakse selle järgi, et puhastustööd saaks kergelt ja turvaliselt teostada.

Eesti standardis EVS-EN 12097:2006, on välja toodud puhastusluukide miinimum mõõdud ja asukohad.

Paigaldus

Puhastusluukide paigaldamisel:

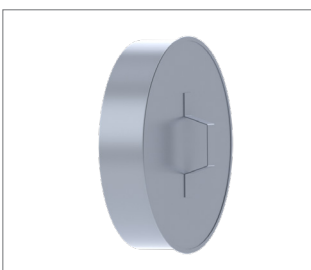

- kontrolli, et torusse lõigatud ava serva ei jääks teravaid servi
- pane puhastusluukide paigaldamiseks või kanali puhastamiseks kätte kaitsekindad traumade vältimiseks
- kontrolli, et tulekindluse tagamiseks selleks ettenähtud kohtades oleksid puhastusluugid kinnitatud kruvidega

NALMHE

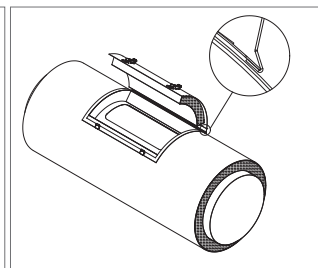

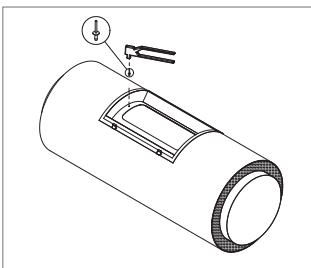

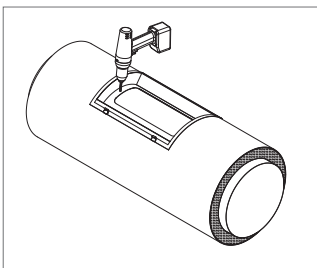

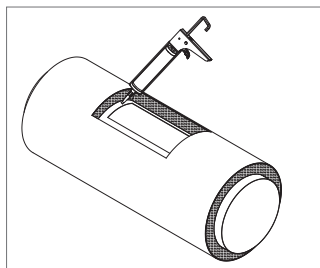

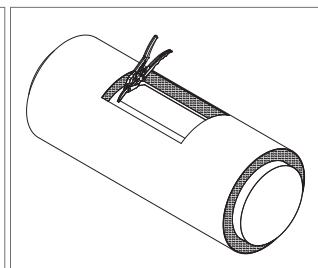

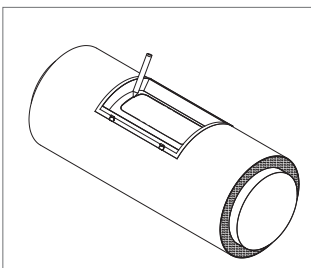

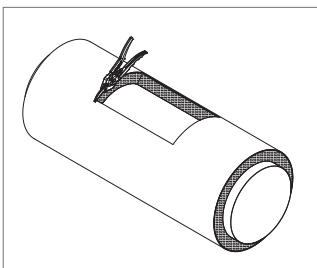

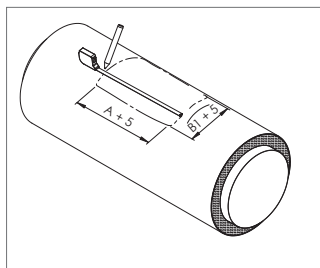

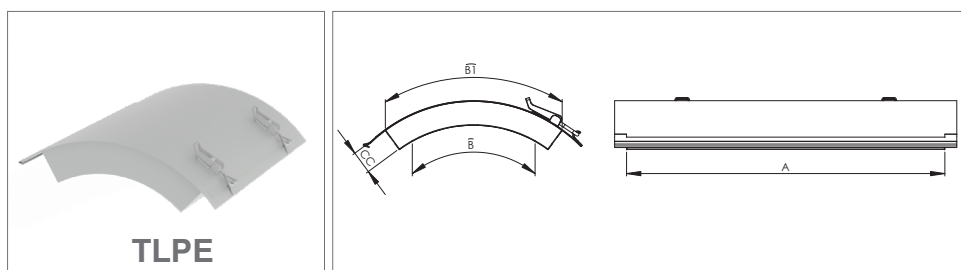

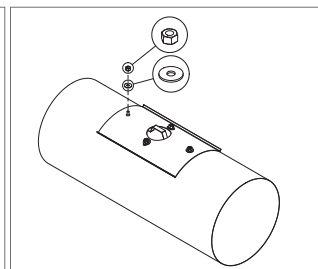

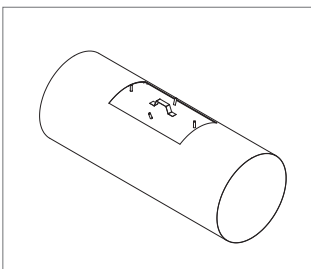

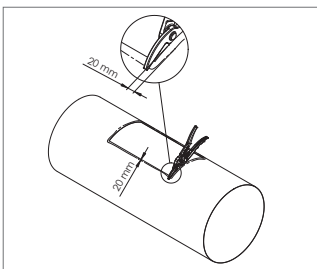

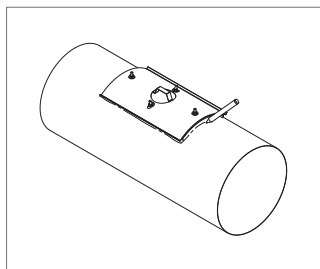

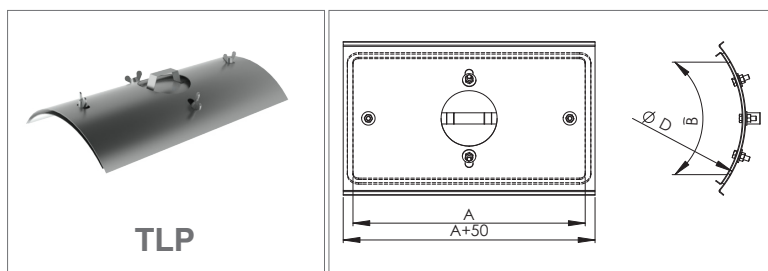

TLP

1. Kinnita paigaldusšabloon toru peale sirgelt toru pikisuunas.
2. Lõika kleebise serva mööda torusse ava ja puhasta lõikeserv.
3. Paigalda luuk avasse jälgides kleebise kinnitismärke.
4. Kinnita luuk käepidet alla vajutades.
