

TS Sauna duct

TS sauna duct is a telescope-style rectangular duct with round connections at both ends. One end has a take-off with rubber gasket for the connection with ventilation duct and the other end a duct-sized take-off for a exhaust air valve. Thanks to small dimensions of the duct it can be placed into the thin-wall construction.

Construction and dimensions

Dimensions of the connections are Ø 100 and 125 mm. Length of the duct is 1400-2400 mm. Standard material: galvanized steel. Can also be manufactured of other materials.

Nominal size d	A (mm)	B (mm)	Weight (kg)
100	140	40	5,7
125	170	40	6,8
