

REG/REGI Egg Crate Grilles

The REG is a durable and minimalistic egg crate grille, designed for efficient air intake. It's squared 13x13 mm grid ensures high free area and great airflow capacity.

Can be installed to SKRM plenum box or rectangular duct using the mounting frame. Removable for easy access during maintenance.

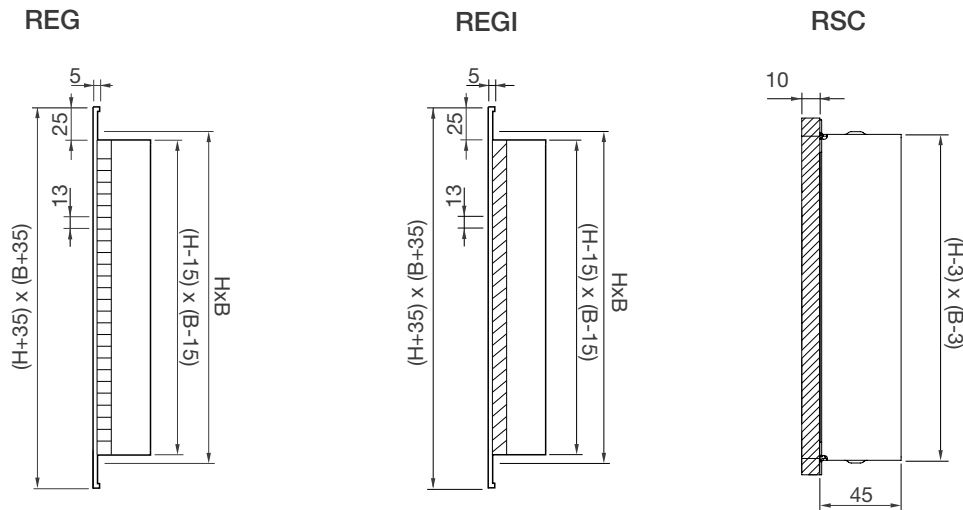

- REG - Egg crate grille
- REGI - Egg crate grille 45° deflection (to reduce visibility through the grille)

Structure and Dimensions

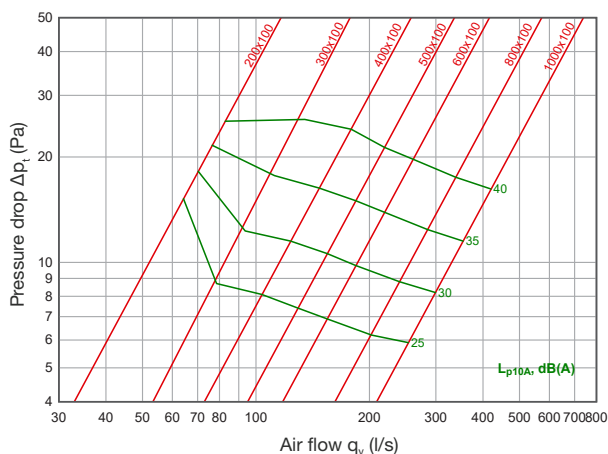

Made from aluminium and available in a wide range of standard sizes. The minimum size of the REG grille is 200x100 mm and the maximum 1000x300 mm. Standard color RAL 9016, other colors available on request. The grille is supplied with RSC zinc-magnesium coated steel (ZM 310) mounting frame.

Easy to install with standard fixing clips.
