

ECL-T Compensator

ECL-T compensator is a part of certified NORDsmoke smoke and heat control system. The compensator is intended for the installation into sheet metal smoke control ducts to prevent damage from the forces generated by longitudinal thermal expansion.

The distance between two compensators shall not exceed 10 m.

Technical description

ECL-T connection frame is made of hot-galvanised sheet steel, DX51D+Z275. Connection frame fits with E30 connection profile.

For flexible joint are used an air-tight joint and a fabric.
