

RSKT Backdraft damper

RSKT circular backdraft dampers are designed to effectively prevent the reversal of airflow in HVAC systems. The blades are spring-loaded and when the fan is switched off they close.

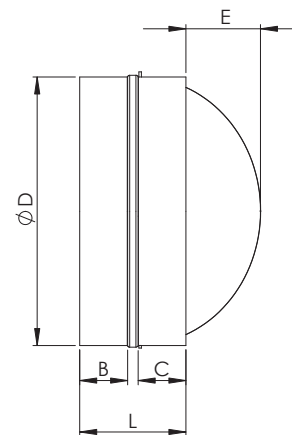

- Diameters 100-400 mm
- Installation between ducts

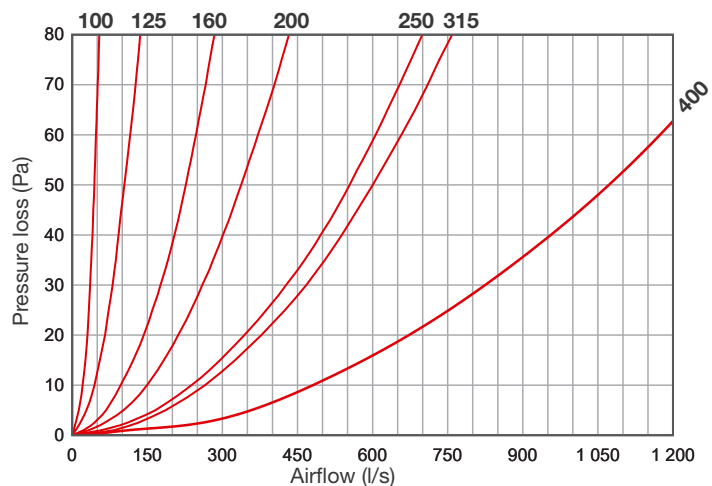

Structure and dimensions

RSKT dampers casing is manufactured of galvanized steel and the blades of aluminium. When mounted between the horizontal ducts, the shaft of installed damper shall be in vertical position.

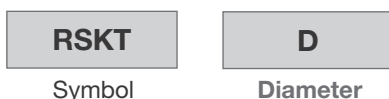

Nominal size D, mm	L, mm	B, mm	C, mm	E, mm	Weight, kg
100	92	37	40	22	0,14
125	92	37	40	22	0,17
160	90	40	40	40	0,25
200	96	37	40	58	0,38
250	126	54	58	68	0,68
315	126	56	56	100	0,8
400	126	54	58	100	1,2
